

The ordinary cigar, like the ordinary gun, has a "kick"—bad breath, thumping head, bumping nerves. You can "smoke-your-head-off" with this cigar and yet feel fit as a fiddle.

The State Journal 5¢ CIGAR

A sweet, cool smoke, and you relish every fragrant puff right down to the stub. It burns evenly and smokes freely. We say, and who knows, that a better nickel cigar was never made.

Made by the oldest cigar factory west of the Missouri River.

Chas. F. Pusch, Cigar Manufacturer
Marysville, Kansas.

SNAP SHOTS AT HOME NEWS

Potato bugs are reported to be unusually thick in Topeka and vicinity this spring.

The volleyball contests Wednesday and Saturday evenings at the Central Y. M. C. A. will be the finals in the spring tournaments.

The Central Y. M. C. A. circus paid out and there was enough money to spare to pay off an indebtedness on the gymnasium bleachers.

The welcome of the recent rains is not unanimous. Orchardists who have trees to spray are handicapped by rain in fighting insect pests.

Topeka is the only city in the country standing on top of her baseball list with a percentage of 1,000. How long will it last, how long will it last? J. R. Johnson, the Oakland auto agent for Topeka, reports the sale of Oakland to Mrs. Ben Diment, Sixth and Fillmore, and Theodore Forbes of North Topeka.

The Topeka Automobile club will meet at the Commercial club quarters Tuesday evening at 8 o'clock. All motor car owners of the city are urged to attend.

Tomorrow will be the opening day of the Western League baseball season in Topeka. It is Topeka's chance to indicate her support to the new baseball administration.

"The Nazarene revival mission needs money, old clothes and groceries, for the poor. We have fed and clothed 50 poor men, women and children in the last year," Rev. D. E. Blakely, president.

An open meeting of the Highland Park grange will be held at the Highland Park school house Tuesday evening at 8 o'clock. Dr. S. J. Crumrine will make an address on "Hygiene and Health."

The Commercial Club Bulletin urges the members of the club to support both the proposition for a special tax levy to make possible a free rate at the state fair, Topeka, and that of using voting machines in Shawnee county, both of which will be decided May 15 by the people.

From the standpoint of the future the "kiddies" pledges to Washburn college of \$1 each in annual installments of 25 cents are worth several times as much as the same amounts from adults, for each pledge means a loyal supporter of Washburn in the next generation of citizens.

A spring between Seventeenth street and the north line of the Washburn college campus, which has not flowed for years, but which slaked the thirst of many of Washburn's students of early days, has again become active. A fair sized stream of water trickles from the parking to the paving and flows down the gutter.

There was a rechristening at the city hall today. Hereafter the official title of policemen will be something else. They will be officially known as welfare workers. An ordinance amending another ordinance by changing the words "police women" to "welfare workers" was given passage by the mayor and commissioners.

An ordinance creating the position of city bacteriologist was given second reading by the city commission today. Provision is made for the person holding the position must pass an examination under direction of the head of bacteriology at Washburn college, the secretary of the state board of health, and another expert to be named by the city commissioner of parks.

At a meeting of the city commission today, W. L. Porter, city commissioner of parks, requested that action on an ordinance creating the position of city health officer be postponed, explaining that a state convention of city health officers is to be held in Rosemeade this week and that he will attend the meeting and probably obtain ideas to incorporate in the ordinance. His request was granted and the ordinance referred to him.

A local factory manufacturing ornamental metal goods is in need of more

spacious quarters close in. The building should be at least 25x150 feet in size. If anyone owning property would consider the erection of a building the firm would lease same for a period of years. The concern now employs five men and to meet the demands of the business expects to employ twice that many in the near future.—Commercial Club Bulletin.

The Rev. M. F. Troxell, pastor of the First English Lutheran church, has been called to St. Joseph, Mo., to have charge of the burial services of Mr. Henry Bragge, one of the older citizens of that city. Dr. Troxell left today for Ottawa, where he will address the Eastern Conference of the Kansas synod Tuesday, and then will go to St. Joseph to conduct the funeral of Mr. Bragge Wednesday afternoon. He will return by Thursday morning.

When it was discovered by members of the city commission today that an ordinance creating the office of inspector of foods and weights and measures, which had been prepared and was up for consideration on second reading, merely created the office without defining the duties connected with the job, it was referred to W. L. Porter, city commissioner of parks, who is to see that the ordinance conforms with his wishes before reporting it back for final passage.

The U Girls' club of the First English Lutheran church have ready for presentation Wednesday evening this week at the church the quint

and amusing playlet, "An Old Maids' Convention." The cast is taken by fifteen members of the club under the lead of Miss Maud Taggart, Miss Ellen Foberg and Miss Irene Troxell. The entertaining play gives opportunity for local references and hits that keep the audience always alert to see that nothing is missed. The transformation scenes as the characters come out of the secret chamber have a particular interest and often point a good moral. The U Girls have been hard at work to give the play in its best form.

DID NOT COME UP

City Salary Raising Ordinance
Wasn't Ready Today.

Employees Still Waiting for
Truth of Promises.

That new city salary ordinance, which carries increases for a number of city employees, is about the slowest maturing creature yet discovered. The subject became a matter of interest and the topic of promises away back in July of last year when allowances were made in the budget, but the thing just dragged along. The city commissioners did nothing and the wistfully waiting employees became more wistful and were accorded more waiting.

As election day drew nearer they were told to wait until after election. There was nothing else to do, so they waited. After election anticipations became more acute and just a week ago today the new salary ordinance was due to be introduced.

But it wasn't. Thursday it got as far as having the title prepared and read and the expectation was that today there would really be something doing. Frank Newland, city commissioner of water and lighting, had said that there would probably be quite a fight in open meeting of the city commission.

The fight was to be a matched bout between Mr. Newland and himself, the mayor and other members of the city commission refusing to be drawn into the controversy over the question of whether Mr. Newland would recommend salary increases for the employees of his department in keeping with his promises to them.

But there wasn't any fight. The ordinance did not come up for consideration because the city attorney had not completed it. Something had been typewritten and handed to the members of the city commission, but it was not what they had been expecting, so again action on the salary ordinance was postponed and the city employees must do some more wistful waiting.

HEAT WAVE IN EAST.

Temperature of 83 in Chicago and 84 at Marquette, Mich.

Chicago, April 26.—The present heat wave extending over the eastern half of the United States is unprecedented at this season in the history of the weather bureau, according to today's report of the local weather bureau.

Showers are predicted for the northwest, but insufficient to break the drought, and the end of the hot spell is not in sight. The table of temperature for yesterday, shows it was 83 at Chicago, Marquette, Mich., on the coast of Lake Superior, where navigation ordinarily does not begin until May 1, registered 84 degrees.

Head Stopped Up? Can't Breathe? Try the Vick Vap-O-Rub Treatment

Applied in Salve Form Over Throat and Chest Relieves by Inhalation and Absorption.

Vapor treatments are best for inflammations of the air passages. The vapors carry the medication direct to the inflamed surfaces without disturbing the stomach, as internal medicines will do. A very convenient vapor treatment is a good application of Vick's "Vap-O-Rub" Salve over the throat and chest, covered with a warm flannel cloth. The body heat releases vapors that are inhaled with every breath, opening the air passages, loosening the phlegm, and healing the raw surfaces. For deep chest colds, first apply hot wet towels to open the pores. Vick's is then absorbed through the skin, taking out that tightness and soreness. 25c, 50c, or \$1.00.
